EDUCATION

Computer Science · CÉGEP André-Laurendeau

Graduated 2026

SKILLS

Languages: TypeScript, JavaScript, Python, Java, C#, SQL

Frontend: React, React Native, Next.js, Vue, Nuxt, Angular, Tailwind CSS, TanStack Query

Backend: Spring Boot, ASP.NET Core, Node.js, Firebase

Databases & ORMs: PostgreSQL, NeonDB, SQL Server, Drizzle ORM, EF Core

Infrastructure: NixOS, Kubernetes, Docker, Flux, Helm, colmena, Tailscale, Vercel, Grafana

Soft skills: Agile/Scrum, Technical communication

Other: Git, Claude API, Jira, Notion, Figma

EXPERIENCE

Full-Stack Developer – OpenPayrun

Services Conseils Sensaroli Inc. · Montréal, QC

Jul 2026 – Present

[open-payrun.vercel.app](#)

- Built a Quebec payroll calculator covering QPP, EI, QPIP, and federal/provincial income tax withholding
- Deployed frontend on Vercel and .NET backend on a self-hosted Kubernetes cluster via Tailscale Funnel

Angular 22, C#, .NET 9, SQL Server, Docker, Kubernetes, Tailscale, Vercel

Full-Stack Developer Intern – Internal Marketing Tool

EnJoySocial · Montréal, QC

Jan 2026 – May 2026

[marketing-tool-one.vercel.app](#)

- Built an internal budget management tool directly with the CTO and CEO tracking ad campaigns, quarterly spending, and revenue
- Colorblind-friendly charts with budget forecasting; Claude-powered chatbot for conversational data queries

Vue 3, Nuxt 4, NeonDB, Claude API, Vercel

Full-Stack Developer Intern – Platform Prototypes

EnJoySocial · Montréal, QC

Dec 2024 – Dec 2025

[enjoysocial.ca](#)

- Developed core features for prototypes of a gamified social platform (groups, events, avatar customization), pivoting from React Native to Nuxt
- Built marketplace, quest system, and interactive map; startup pivoted direction before production

React Native, Vue 3, Nuxt 3, TypeScript, Figma

Full-Stack Developer Intern – Payroll Management Tool

Services Conseils Sensaroli Inc. · Montréal, QC

May – Aug 2023

[github.com/StacAttacc/payroll](#)

- Built an internal payroll management tool to replace QuickBooks for in-house payroll processing
- Ensured maintainability and correctness through SOLID architecture, OAuth2/Firebase auth, and XUnit tests

Angular 16, TypeScript, Angular Material, C#, .NET Core 6, SQL Server, EF Core, Firebase

PROJECTS

BiggerWorld

Personal homelab

Feb 2025 – Present

[github.com/StacAttacc/BiggerWorld](#)

- Self-hosted Kubernetes cluster built from spare hardware: every host declared in a Nix flake, every workload delivered by Flux
- SSO via Authentik, runtime secrets via Vault, public exposure via Tailscale Funnel

NixOS, k3s, Flux, SOPS, Vault, Authentik, Tailscale, colmena, Helm, Prometheus, Loki, Grafana

Prose

Academic project

Sep – Dec 2025

[prose-jet.vercel.app](#)

- Rebuilt our cégep's internship management platform from the ground up with a 5-person team over 6 weekly Agile sprints
- Students browse and apply to offers, employers post positions, coordinators track students throughout their journey

React 19, TypeScript, Tailwind CSS, Vite, Java 21, Spring Boot, Spring Security, PostgreSQL, Docker

Next Stitch

Personal project

Jan – Jun 2025

[next-stitch-henna.vercel.app](#)

- Multi-user sewing project manager: pattern and material tracking, progress photos and checklists
- Patterns uploadable, scraped from the web, or generated via the Claude API

React 19, Next.js 16, next-auth, NeonDB, DaisyUI, Claude API
