EDUCATION

Techniques de l'informatique · CÉGEP André-Laurendeau

2019 – 2026

SKILLS

Languages: TypeScript, JavaScript, Python, Java, C#, SQL

Frontend: React, React Native, Next.js, Vue, Nuxt, Angular, Tailwind CSS

Backend: Spring Boot, .NET Core, Node.js

Databases: PostgreSQL, NeonDB, SQL Server, Drizzle ORM

Infrastructure: NixOS, Kubernetes, Docker, Flux, Tailscale

Soft skills: Self-directed, Collaborative, Adaptable, Technical communication

Other: Git, Claude API, Jira, Notion, Figma

EXPERIENCE

Full-Stack Developer Intern – Internal Tools

EnJoySocial · Montréal, QC

Jan 2026 – May 2026

github.com/StacAttacc/marketing-tool

- Collaborated with the CTO and CEO to build an internal budget management tool tracking ad campaigns, quarterly spending, and revenue
- Implemented colorblind-friendly charts and dashboards with budget forecasting from historical data
- Integrated a Claude-powered chatbot for querying budget data conversationally

Vue 3, Nuxt, TypeScript, NeonDB, Drizzle ORM, Claude API

Full-Stack Developer Intern – Product

EnJoySocial · Montréal, QC

Dec 2024 – Dec 2025

- Built first prototypes of a gamified social platform (groups, events, avatar customization with earnable cosmetics), pivoting from a React Native mobile app to a Nuxt web app
- Implemented core features: marketplace, quest system for earning points, interactive map, and groups

React Native, Vue 3, Nuxt, TypeScript

Full-Stack Developer Intern

Services Conseils Sensaroli Inc. · Montréal, QC

May – Aug 2023

github.com/StacAttacc/payroll

- Built an internal payroll management tool to replace QuickBooks for in-house payroll processing
- Ensured maintainability and correctness through SOLID architecture, OAuth2/Firebase auth, and XUnit tests

Angular 16, C#, .NET Core 6, SQL Server, EF Core

PROJECTS

BiggerWorld

Personal homelab

Feb 2025 – Present

github.com/StacAttacc/BiggerWorld

- Self-hosted Kubernetes cluster built from spare hardware: every host declared in a Nix flake, every workload delivered by Flux
- SSO via Authentik, runtime secrets via Vault, public exposure via Tailscale Funnel

NixOS, k3s, Flux, SOPS, Vault, Authentik, Tailscale, Grafana

Next Stitch

Personal project

Jan – Jun 2025

github.com/StacAttacc/NextStitch

- Sewing project manager: multi-garment projects, pattern and material tracking, progress photos and checklists
- Patterns can be uploaded, scraped from the web, or generated with the Claude API
- Measurements managed in reusable FreeSewing-inspired measurement sets

React, Next.js, TypeScript, NeonDB, Drizzle ORM, Claude API

Prose

Academic project

Sep – Dec 2025

github.com/StacAttacc/Prose

- Rebuilt our cégep's internship management platform from the ground up with a 5-person team over 6 weekly Agile sprints
- Students browse and apply to offers, employers post positions, coordinators track students throughout their journey

React, Java, Spring Boot, PostgreSQL, Docker
